

## Social Networking Apps Uncovered

### Application:

Messenger

### Synopsis:

Messenger is an application linked to Facebook. It works similarly to e-mail and shares your Facebook contacts. When you receive a message on this application, you will also receive notification in your Facebook account as well.

With this application you can see when someone has viewed your message as their Facebook profile picture will appear next to the message. You also have the facility to send group messages, there is an 'emoji' facility on this allowing you to insert pictures into your message.

If a person has stored their contact details in their Facebook profile, such as mobile phone number, this application has the facility to allow you to call them. You can only do this when you are connected to Wi-Fi or 3G / 4G.

### Installation Instructions:

1. Open up your app store on your smart phone and search 'Messenger'.
2. Click on the 'get' button. This application is free.
3. Once it is installed, open up the app.
4. It will ask you if it can access your contact via Facebook, click agree.
5. You now can start using messenger.
