

Social Networking Apps Uncovered

Application:

meet me ☺

Synopsis:

MeetMe is a social networking app which connects people within their local area, by using the GPS on your phone to track your location.

This app has the facility to allow you to search for people or groups who share similar interests to yourself and you are able to chat and share views with them. Even though it is not a dating site it does have a 'match' facility as well as giving the option to secretly admire other users.

Possible Concerns:

There are always dangers to dating sites, as you don't know if the person behind the picture is who they say they are. People just need to be mindful when using them, by letting others know if they are meeting up and picking a safe location.

Installation Instructions:

1. Open up your app store on your smart phone and search 'MeetMe'.
2. Click on the 'get' button. This application is free.
3. Once this application is installed, click on the 'open' button.
4. It will ask to either connect through Facebook or set up an account.
5. After selecting 'set up account', it will ask permission access your location, you can either select 'accept' or 'decline'.
6. It will now take you through a series of questions, such as your name, gender, age, e-mail address, password, picture, etc.
7. Once you have filled in all these details, it will bring up matches of people in your area.
